

## Year 12 MUISC Transition Tasks

### Research Task

‘What is Practice?’ – research and explore a variety of aspects which are important when starting to practice an instrument. E.g. short and long term goals, physical space, equipment etc

⇒ Make a note of these different aspects.

Now think about your own instrument. Research practice techniques on your specific instrument. Scales and arpeggios are warm ups for all instruments but there are also many specific techniques to help different instruments.

⇒ Make a note of the various practice techniques for you own instrument

### Create Task

Create a PowerPoint on both the above. Include images and videos - ***if you can record yourself performing the practice techniques and include those!***

This task is for **unit 23**: music performance techniques which is our compulsory unit so I have chosen to start with this one as everyone has to complete it.  
Good luck!
